(54) Title: SYSTEM AND METHOD FOR REPORTING AND DELIVERING SALES AND MARKET RESEARCH DATA

(57) Abstract: A system and method for accessing pharmaceutical data is described. The method includes receiving a username and a password from a web page, and identifying an account having the username and the password associated therewith. The method further includes reading a service level associated with the identified account, determining at least one question that is authorized to be presented to the web page based on the service level associated with the account, and populating a list control element of the web page with the at least one question.
